

**DEPARTMENT
OF EDUCATION**
Minnesota Statewide Test Security Tip Line

Minnesota Assessments require the highest level of test security and accountability. Any action that jeopardizes the integrity of a secure assessment is a test security violation. If you observe or are aware of a potential issue involving, but not limited to improper assistance to a student, sharing or capturing of test content, use of a prohibited device, purposely discouraging specific students from taking the assessment, or any other action that would impact the integrity of the assessment results, please fill out the form below.

If you choose not to submit your name and contact information, the ability of MDE to follow up on your submission is greatly diminished. You can choose to submit this test security report anonymously by checking the appropriate button and your identity will remain anonymous even if you provide your name and contact information. MDE takes test security very seriously and encourages any individual with direct knowledge of a test security issue to submit a report.
